

Quarterly Performance for Single-Piece First-Class Mail® Service Variance

Overview

Since 1990, U.S. Postal Service® has contracted with a third party vendor to measure First-Class Mail® service performance independently and objectively via the External First-Class Mail® Measurement System (EXFC). EXFC is an external sampling system measuring the time it takes from deposit of mail into a collection box or lobby chute until its delivery to a home or business. EXFC measures the transit time for single-piece rate First-Class™ cards, letters, and flat envelopes and compares this actual service against service standards. EXFC continuously tests service in 892 three-digit ZIP Code™ areas among which virtually all Single-Piece First-Class Mail® originates and destines.

Single-Piece First-Class Mail® parcels were classified as a competitive product effective for pieces mailed on or after September 3, 2017; therefore, Single-Piece First-Class Mail® parcel results are no longer included in Single-Piece First-Class Mail® reporting.

Service performance measurement was suspended for mail originating from or destined to the Caribbean District in FY 2018 Quarter 1 due to the devastating impacts of Hurricanes Irma and Maria.

Performance Highlights

National Single-Piece First-Class Mail® results in FY 2018 Quarter 1 were 93.1 percent on time for Two-Day and 78.8 percent on time for Three-To-Five-Day. Nationally, at least 98.9 percent of mail across all service standards was delivered within the service standard plus three days in FY 2018 Quarter 1.

In FY 2018 Quarter 1 at the district level, Western New York had the highest Two-Day performance at 96.5 percent on time. Two-Day performance improved for 18 out of 66 districts compared to the same period last year. In FY 2018 Quarter 1 at the district level, Alaska had the highest Three-To-Five-Day performance at 86.5 percent on time. Three-To-Five-Day performance improved for 8 out of 66 districts compared to the same period last year.
