Mail Safety Is Our Mutual Responsibility

The United States Postal Service® has a greater responsibility than ever before to preserve the trust of our customers, our employees, and those with whom we do business—and to keep them safe. The Aviation Mail Security and Hazardous Materials programs represent the commitment of the Postal Service® to providing a safe environment for our customers, employees, and the traveling public. The danger to life and property in the handling and transportation of hazardous materials is real. It is to our mutual advantage to safeguard ourselves and our property from potential hazards.

What You Can Do to Help

The U.S. Postal Service has taken a proactive role in the areas of aviation mail security and hazardous materials acceptance, handling, and transport for many years. But we also need your help. Each customer must comply with the restrictions outlined in this publication to assist us in maintaining a safe environment for our customers, our employees, and those with whom we do business—and to keep them safe. The Aviation Mail Security and Hazardous Materials programs represent the commitment of the Postal Service® to providing a safe environment for our customers, employees, and the traveling public. The danger to life and property in the handling and transportation of hazardous materials is real. It is to our mutual advantage to safeguard ourselves and our property from potential hazards.

Laws That Keep Us Safe

With certain limited exceptions, the federal law in Title 18 United States Code 1716 (18 U.S.C. 1716) declares it a crime to mail anything that may kill or injure persons or harm property. Persons violating this statute may be subject to fines, imprisonment, or other severe penalties.

The statute, however, allows the Postal Service™ to adopt rules prescribing preparation and packaging conditions under which certain hazardous materials, which are not “outside of their own force dangerous or injurious to life, health, or property,” may be mailed. Because these rules are very limited, most hazardous materials are prohibited from mailing.

Hazard Classes

For purposes of transportation and shipping, federal regulations assign each hazardous material to one of the following nine hazard classes. The following list provides examples of items that are subject to subject to mailing restrictions or prohibitions.

- **Class 1: Explosives**
  - Fireworks, ammunition, fuses, model rocket engines
- **Class 2: Gases**
  - Aerosol, air bag inflators, scuba tanks
- **Class 3: Flammable Liquids**
  - Gasoline, some paints or inks, varnishes, some cosmetics, perfumes, and items containing fuel or fuel residue
- **Class 4: Flammable Solids**
  - Matches, signal flares
- **Class 5: Oxidizing Materials**
  - Oxidizers, potassium cyanide, parathion, pesticides, flea collars, tear gas, irritating materials, items containing ethylchlorides, used sharps, used medical devices
- **Class 6: Corrosives**
  - Chlorine bleaches, ammonia, batteries, drain cleaners, acids, mercury
- **Class 7: Radioactive Materials**
  - Plutonium or its compounds, plutonium oxide, uranium 238 oxide, thorium 232 oxide
- **Class 8: Poisons**
  - Chlordane, dieldrin, lead, lead compounds, arsenic, potassium cyanide, parathion, pesticides, flea collars, tear gas, irritating materials, items containing ethylchlorides, used sharps, used medical devices
- **Class 9: Miscellaneous Hazardous Materials**
  - Mercury, lead, lead compounds, silver compounds, potassium cyanide, parathion, pesticides, flea collars, tear gas, irritating materials, items containing ethylchlorides, used sharps, used medical devices

Prohibited

- **Domestic Hazardous Materials Warning Labels**
  - Material or packaging bearing, or required to bear, any of the following U.S. Department of Transportation (DOT) warning labels is prohibited or potentially prohibited.
  - [List of DOT warning labels]

Potentialy Mailable to Domestic Destinations*

Class 4: Flammable Solids

- Matches, signal flares

Class 5: Oxidizing Liquids

- Oxidizing liquids, nitrates, swimming pool chemicals, peroxides

Class 6: Toxic Materials and Infectious Substances

- Arsenic, potassium cyanide, parasites, pesticides, flea collars, tear gas, irritating materials, items containing etiologic agents, used sharps, used medical devices

Class 7: Radioactive Materials

- Products with a radioactive warning label

Class 8: Corrosives

- Chlorine bleach, ammonia, batteries, drain cleaners, acids, mercury

Class 9: Miscellaneous Hazardous Materials

- Magnetized materials, dry ice, self-inflating lifesaving devices, lithium and lithium-ion batteries

Warning Labels

Material or packaging bearing, or required to bear, any of the following U.S. Department of Transportation (DOT) warning labels is prohibited or potentially prohibited.

Prohibited

- Corrosive
- Oxidizer
- Organic Peroxide
- Limited Quantity
- Packing Group II
- Radioactive
- Infectious Substances
- amplification and printing and reproduction

Mail Safety Is Our Mutual Responsibility

The United States Postal Service® has a greater responsibility than ever before to preserve the trust of our customers, our employees, and those with whom we do business — and to keep them safe. The Aviation Mail Security and Hazardous Materials programs represent the commitment of the Postal Service® to providing a safe environment for our customers, employees, and the traveling public. The danger to life and property in the handling and transportation of hazardous materials is real. It is our mutual advantage to safeguard ourselves and our property from potential hazards.

What You Can Do to Help

The U.S. Postal Service has taken a proactive role in the areas of aviation mail security and hazardous materials acceptance, handling, and transport for many years. But we also need your help. Each customer must comply with the restrictions outlined in this publication to assist us in securing a safe mailing environment for us all.

Mailers:

- Must know the physical characteristics of the hazardous materials they wish to mail.
- Are responsible for ensuring that they do not mail any hazardous material that can injure persons or property unless the hazardous material is permitted under the mailing standards. Further guidance on domestic, international, and APO/FPO/DPO mailability is available from Publication 52, Hazardous, Restricted, and Permissible Mail. The Mailing Standards of the United States Postal Service, International Mail Manual (IMM)™ contains the standards that apply to hazardous materials intended for foreign addresses.
- May reuse packaging and boxes when all markings or labels for hazardous materials may result in delivery delays or a package return.

Ask Before You Mail

Please check with local Postal Service™ officials before attempting to mail any of the items noted in this publication. Remember, it is your responsibility to ensure that articles you present for mailing comply with all Postal Service regulations.

Improper mailing of hazardous materials may subject you to civil and/or criminal liability.

Pricing and Classification Service Center

You can get more information from your local Post Office™ and the Pricing and Classification Service Center (PCSC) which can be contacted at:
