The Informed Visibility® Mail Tracking & Reporting (IV®-MTR) application enables mailers to leverage key information about their mailings to manage operations, refine processes, and adjust marketing campaigns as needed. This insight allows mailers to more effectively plan and manage mailings, increasing value to their customers.

IV-MTR provides near real-time, end-to-end mail tracking information for letter and flat pieces, bundles, handling units, and containers.

IV-MTR leverages the intelligence of Full-Service Intelligent Mail® to create logical and assumed handling events that provide expanded visibility.

IV-MTR improves ease of use through flexible data provisioning and flexible data delegation, allowing mailers to receive and share the information they want, when they want, and how they want.

### ENROLLMENT PROCESS

1. Register for a BCG account, if you do not have one.

2. Log into the BCG.

3. In the left-hand navigation area, click Mailing Services.

4. In the list of services, find Informed Visibility, and click Get Access.

5. Business Service Administrator (BSA): Contact the IV-MTR Help Desk and request the BSA authorization code. You will need to provide your contact information.

6. BSA: Access the IV-MTR application. When prompted, enter the authorization code and click Submit. The CRID is successfully set up within the application.

To go to the IV-MTR page, click Informed Visibility (IV) just below the search box.

Corporate Reporting

July 2018
**ESTABLISHING REPORTS**

IV-MTR allows mailers to retrieve mail tracking data from the IV-MTR website as a one-time query or recurring data feed.

**One-Time Query** (Receive ad-hoc data)

1. Select the entities, meaning the CRIDs, MIDs, and/or routing codes, for which to receive mail tracking data.
2. Select the delivery method. The options are Online View, Download, or Send via Secure FTP.
3. Customize the look and feel by selecting the mail object and handling event type, adding a filter, and selecting the data fields.

**Data Feed (Subscription)** (Receive data on a recurring basis)

1. Create a data feed by selecting the file format, delivery location, frequency, and other options.
2. Select the entities, meaning the CRIDs, MIDs, and/or routing codes, for which to receive mail tracking data.
3. Customize the look and feel by selecting the mail object and handling event type, adding a filter, and selecting the data fields.

**DATA DELEGATION**

Mailers are able to share and receive visibility of data in multiple ways. These actions are performed using the four tabs on the Delegation Data page in the IV-MTR application.

**Request Data Delegation**: Allows a Mail Service Provider to request visibility of a CRID/MID from a Mail Owner

**Delegate Data to Others**: Allows a Mail Owner to provide visibility of a CRID/MID to an MSP

**Manage Data Delegation**: Allows a Mail Owner to approve/deny requests and manage existing delegations

**Data Delegated to My CRID**: Allows an MSP to view and/or delete existing delegations providing visibility of a CRID/MID
