TÜV SÜD America, Inc. – Ruby Canyon conducted the verification of USPS' FY2023 BlueEarth™ Carbon Accounting workbook according to the requirements found in ISO 14064-3:2019, 14065:2020, & 17029:2019. The objective of this verification was to ensure that the GHG statement is materially correct and conforms to all relevant criteria. The GHG statement is the responsibility of USPS. A summary of the GHG statement is as follows:

- GHG-related activity: USPS' operations within the US and its territories
- GHG statement: Fiscal Year 2023: October 1, 2022 to September 31, 2023
- Criteria:
 - World Resources Institute and World Business Council for Sustainable Development, The Greenhouse Gas Protocol, revised edition
 - World Resources Institute and World Business Council for Sustainable Development, Corporate Value Chain (Scope 3) Accounting and Reporting Standard
 - EN 16258 Methodology for calculation and declaration of energy consumption and GHG emissions for the FEMP GHG Scope 1, 2, and 3 emissions

The data and information supporting the GHG statement were hypothetical and historical in nature.

Based on the examination of the evidence, nothing comes to RCE's attention which gives cause to believe that the GHG statement is not a fair representation of GHG data and information.

RCE has verified USPS' workbook to a limited level of assurance, and confirms that there is no evidence that the GHG statement:

- Is not materially correct and
- Has not been prepared in accordance with all applicable criteria.

In compliance with the requirements of ISO 14065:2020, the client may reproduce and distribute RCE's verification opinion without RCE's prior authorization, as long as the verification opinion is reproduced in its entirety, including the date.
